Berkeley, California • as9804@berkeley.edu • linkedin.com/in/hyunwook-jung

Software Engineer

Dynamic Software Engineer with experience in JavaScript, React, and MongoDB. Proven track record of accelerating team development and fostering cross-cultural collaboration. Eager learner and creative problem-solver.

WORK EXPERIENCE

WorkOnward • Remote • 09/2023 – Present

Software Engineer • Full-time

- Developed and maintained a server-side feature with JavaScript, D3, ES6, and React, contributing to a more robust and innovative product for 10,000+ users worldwide.
- Drove 50% faster product development through agile collaboration with UI designers and engineers on Figma, ensuring rapid and accurate integration of design elements.
- Improved customer value by implementing tests for SaaS products, API, and user interface, resulting in a 20% decrease in post-release defects and enhanced user experience.
- Developed and delivered multiple machine learning backend features, resulting in 20% increase in system efficiency and customer value.
- Collaborated in team planning and reflection meetings, leading to the continuous improvement of the team's capacity and estimation abilities, resulting in a more reliable product delivery and enhanced team performance
- Delivered 28+ Google documents to report to the team leader and raised over 300 issues/suggestions on GitHub Issue, increasing the speed of the team's development by over 50% in 6 months.
